

INTAN NURUL FAIZIA

Front-End Developer

Semarang, Indonesia | 085374174230 | intannurul28032005@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Front-end developer experienced in Laravel, Tailwind CSS, and Figma, from requirements research to a finished interface. Enjoys turning requirements and design ideas into responsive, user-friendly interfaces across LMS, course platforms, and equipment loan systems. Informatics Engineering diploma student with hands-on experience in academic and internship projects, able to work collaboratively, communicate effectively, and stay open to learning current trends in design and technology.

EDUCATION

Politeknik Negeri Semarang – Semarang

Sep 2023 – Sep 2026

Diploma in Informatics Engineering, GPA 3.87/4.00

- Focused on web development, front-end design, databases, artificial intelligence (AI), and the Internet of Things (IoT).
- Actively worked on team projects involving information systems and web applications throughout studies.
- Involved in student organizations, including the Electrical Engineering Student Association (HME) and Google Developer Student Club (GDSC).

EXPERIENCE

Front-End Developer & UI/UX Designer Intern – PT. Razen Teknologi Indonesia

Aug 2025 – Des 2025

- Built a responsive Learning Management System (LMS) interface using HTML, CSS, Tailwind CSS, and Laravel.
- Translated Figma designs into functional, product-consistent UI components.
- Designed 53 UI/UX mockups and prototypes in Figma across multiple project categories.
- Produced TikTok video content to support the company's promotional and documentation needs.

DevCourse — Online Course Platform – PT. Razen Teknologi Indonesia

Oct 2025 – Des 2025

- Developed features for an online course website using the Laravel framework, building responsive user interfaces and implementing page designs.
- Debugged interface and functionality issues across multiple pages to enhance the overall user experience.

Alatika — Lab Equipment Loan System – Politeknik Negeri Semarang

Mar 2026 – Jul 2026

- Developed the front-end of a web-based laboratory equipment loan system, connected to a Laravel and MySQL back end.
- Collaborated directly with users during evaluation sessions to identify and resolve functional and usability issues.

SIM Magang RS — Hospital Internship Information System – Politeknik Negeri Semarang

Mar 2025 – Jul 2025

- Contributed to the development of the user interface for an internship information system website at RSUD dr. Adhyatma, MPH Semarang.
